

ExamLabs

**Cisco Certified Technician
Routing & Switching (RSTECH)
Study Guide
Exam 100-490**

Chapter 1	Network Fundamentals
	Introduction to Networks
	Network Characteristics
	Networking Components
	Network Locations
	Local Area Networks
	Wide Area Networks
	Common Network Services and Devices
	Types of Services
	Network Infrastructure Components
	Collision Domains and Broadcast Domains
	Exercise 1-1: Identifying Network Components
	Network Design Models
	Network Topologies
	Physical vs. Logical Topologies
	Fully and Partially Meshed Topologies
	Types of Cabling
	Copper Cabling
	Fiber
	Access Methods
	CSMA/CD
	CSMA/CA
	Token Passing
	Network Architectures
	Ethernet

ExamLabs

Fast Ethernet

Gigabit Ethernet

10-Gigabit Ethernet

Serial, Optical, and Other Architectures

GBICs

Troubleshooting Interface and Cable Issues

Virtualization Fundamentals

Chapter Review

Quick Review

Questions

Answers

Chapter 2 OSI Reference Model

Layers of the OSI Reference Model

Layer 7: The Application Layer

Layer 6: The Presentation Layer

Layer 5: The Session Layer

Layer 4: The Transport Layer

Layer 3: The Network Layer

Layer 2: The Data Link Layer

Layer 1: The Physical Layer

Devices

Exercise 2-1: Mixing and Matching OSI Model

Definitions

Encapsulation and De-encapsulation

Going Down the Protocol Stack

Going Up the Protocol Stack

Layers and Communication

Chapter Review

Quick Review

Questions

Answers

Chapter 3 TCP/IP Protocol Suite

The TCP/IP Model

ExamLabs

Application Layer

Transport Layer

Internet Layer

Network Access Layer

Transport Layer Protocols

Transmission Control Protocol

User Datagram Protocol

Internet Layer Protocols

Internet Protocol

Internet Control Message Protocol

Address Resolution Protocol

Exercise 3-1: Identifying TCP/IP Protocols

Chapter Review

Quick Review

Questions

Answers

Chapter 4 IP Addressing Basics

Configuring TCP/IP

IP Address

Subnet Mask

Exercise 4-1: Identifying Remote Systems

Default Gateway

TCP/IP Addressing

Understanding Binary

Exercise 4-2: Converting Decimal to Binary

Exercise 4-3: Converting Binary to Decimal

Address Classes

Exercise 4-4: Identifying Address Classes

Loopback Address

Private Addresses

Invalid IP Addresses for Hosts

Exercise 4-5: Understanding Valid Addresses

Addressing Schemes

TCP/IP Ports

ExamLabs

Configuring IP Address Settings

Manual Configuration vs. DHCP

Configuring TCP/IP on Systems

Verify IP Address Settings

Understanding the Pathway of Communication

Exercise 4-6: Analyzing the Pathway to Communication

Chapter Review

Quick Review

Questions

Answers

Chapter 5 Subnetting and VLSM

Understanding Subnetting

Subnetting Class A Networks

Subnetting Class B Networks

Subnetting Class C Networks

Exercise 5-1: Subnetting an IP Addresses

Subnetting Shortcuts

Exercise 5-2: Subnetting Using the Shortcut Method

Classful vs. Classless Addressing

IP Subnet Zero

Variable Length Subnet Masks

Exercise 5-3: Using VLSM on a Network

Route Summarization

Advantages of Summarization

Classless Interdomain Routing (CIDR)

Exercise 5-4: Additional Subnetting Practices

Chapter Review

Quick Review

Questions

Answers

Chapter 6 Cisco Device Basics

Working with Cisco Devices and Software

Types of Cisco Devices

ExamLabs

Identifying Device Model Numbers and Serial Numbers

Common Components on Cisco Devices

Using Cisco Software

Working with Ports on Cisco Devices

Working with Cisco Hardware

Types of Cisco Device Cables

Exercise 6-1: Identifying Cisco Device Components

Understanding Memory Types

Read-Only Memory (ROM)

Flash Memory

Volatile RAM (VRAM)

Nonvolatile RAM (NVRAM)

Exercise 6-2: Identifying Memory Types

Administering the Cisco Device

Using the CLI

Web-based Tools

Starting the Cisco Device

Boot Process

Bootstrap Program

System Configuration Dialog

Service-Related Tasks for Technicians

Using a Text Editor

Launching a Command Prompt

Configuring NIC Settings

Connecting to the Console Port

Using Terminal Emulator Software

Connect and Verify the Status of the Device Interface

Chapter Review

Quick Review

Questions

Answers

Chapter 7 Cisco IOS Basics
Command-Line Interface
IOS Differences

ExamLabs

Interacting with IOS

CLI Access Modes

IOS Basics

Command Abbreviation and Completion

Context-Sensitive Help

Error Messages

Entering Commands

IOS Feature Example

Basic IOS Configuration

Accessing Configuration Mode

Device Identification

Subconfiguration Modes

Line Configuration

Interface Configuration

Exercise 7-1: Basic Router Configuration

Basic IOS Security Configuration

Physical and Environmental Threats

Passwords

Exercise 7-2: Configuring Passwords

Configuring Banners

Exercise 7-3: Setting Banners

IOS Operation and Verification

Show and Debug Command Overview

Running and Startup Configuration

Device Version Information

Interface Information

Exercise 7-4: Viewing Your Configuration

Chapter Review

Quick Review

Questions

Answers

Chapter 8 Cisco Device Management

Router Configuration Files

Saving Configuration Files

ExamLabs

Restoring Configuration Files

Creating and Deleting Configuration Files

Configuration File Nomenclature

Review of Configuration Files

Exercise 8-1: Manipulating Your Router's Configuration Files

Changes in Your Network

Adding Devices

Changing Devices

IOS Image Files

Naming Conventions for IOS Images

Before Upgrading the IOS Image

Exercise 8-2: Installing TFTP Software

Backing Up an IOS Image

Upgrading an IOS Image

Exercise 8-3: Backing Up and Restoring Device Configuration and IOS

Remote Access to Your Cisco Device

SSH vs. Telnet Access

Telnet Configuration

Exercise 8-4: Configuring Telnet on the Cisco Device

SSH Configuration

Configuration Registers and Password Recovery

Configuration Registers

Password Recovery

Exercise 8-5: Using the Password Recovery Procedure

Troubleshooting and Debugging

Local ARP Table

Cisco Discovery Protocol

Using LLDP

Layer 3 Connectivity Testing

Layer 7 Connectivity Testing

Debug Overview

Exercise 8-6: Using the Router's Troubleshooting Tools

ExamLabs

- Licensing Cisco Devices
 - Installing Licenses
 - Licensing Verification
 - Managing Licenses
- Chapter Review
- Quick Review
 - Questions
 - Answers

Chapter 9 Switching Basics

- Understanding Switch Features
 - Switch Functions
 - Exercise 9-1:** Verifying the Loop Avoidance Feature
 - Operation Modes
- Identifying Switch Components
 - Chassis and Physical Ports
 - LEDs and Display Modes
- Basic Switch Configuration
 - Initial Configuration Dialog
 - Basic Settings
 - Exercise 9-2:** Configuring a Switch
 - MAC Address Table
 - Static MAC Addresses
 - Exercise 9-3:** Working with the MAC Address Table
- Interface Configuration
 - Configuring Ports
 - Exercise 9-4:** Configuring Interfaces on a Switch
 - Understanding Port Security
 - Exercise 9-5:** Configuring Port Security on a Cisco Switch
- Working with VLANs
 - Subnets and VLANs
 - Scalability
 - VLANs and Traffic Types
 - VLAN Membership

ExamLabs

VLAN Connections

- Access Ports

- Trunk Ports for Interswitch Connectivity

- Configuring Trunks

- Creating VLANs

- Basic Troubleshooting of VLANs and Trunks

- Exercise 9-6:** Configuring VLANs

Chapter Review

Quick Review

- Questions

- Answers

Chapter 10 Advanced Switching Features

VLAN Trunking Protocol

- VTP Modes

- VTP Messages

- VTP Pruning

- Management VLAN

- Configuring VTP

- Exercise 10-1:** Working with VTP

Spanning Tree Protocol

- Bridge Protocol Data Units

- Root Switch

- Root Port

- Designated Port

- Port States

- Layer 2 Convergence

- Per-VLAN Spanning Tree+ (PVST+)

- Simple STP Example

Rapid Spanning Tree Protocol

- Additional Port Roles

- RSTP BPDUs

- RSTP Convergence Features

- RSTP Configuration

- PVST+ and RSTP Optimization

ExamLabs

STP Troubleshooting

Exercise 10-2: Monitoring STP

EtherChannels

EtherChannel Overview

EtherChannel Configuration

Exercise 10-3: Working with EtherChannel

Chapter Review

Quick Review

Questions

Answers

Chapter 11 Introduction to Routing

Understanding Routing

Routing Concepts

Interface Configuration

Viewing the Routing Table

Configuring Static Routing

Exercise 11-1: Configuring Cisco Routers

Understanding Dynamic Routing

Routing Metrics

Configuring a Routing Protocol

Distance Vector Protocols

Link State Protocols

Hybrid Protocols

The Routing Process

Types of Routes

Selecting a Route

Routing Troubleshooting Commands

The clear ip route Command

The show ip protocols Command

The show ip route Command

The debug ip <protocol> Command

Router-on-a-Stick

Subinterface Configuration

Interface Encapsulation

ExamLabs

Router-on-a-Stick Example Configuration

Router High Availability

Problems of Traditional Default Gateway Redundancy
Solutions

Hot Standby Router Protocol

Other Protocols

Chapter Review

Quick Review

Questions

Answers

Chapter 12 OSPF Routing

OSPF Overview

Hierarchical Design: Areas

Metric Structure

OSPF Operation

Router Identities

Finding Neighbors

Designated and Backup Designated Routers

Sharing Routing Information

OSPF Configuration

Loopback Interfaces

Default Route Propagation

OSPF Metric Values

OSPF Authentication

OSPF Troubleshooting

The show ip protocols Command

The show ip route Command

The show ip ospf Command

The show ip ospf database Command

The show ip ospf interface Command

The show ip ospf neighbor Command

The debug ip ospf adj Command

The debug ip ospf events Command

The debug ip ospf packet Command

ExamLabs

Exercise 12-1: Configuring OSPF

Chapter Review

Quick Review

Questions

Answers

Chapter 13 IP Services

Understanding Network Services

Hostname Resolution

Network Time Protocol

Simple Network Management Protocol

Other Network Services

Exercise 13-1: Configuring Hostname Resolution

Configuring DHCP Services

Understanding DHCP

DHCP Server Configuration

DHCP Relay Configuration

Exercise 13-2: Configuring DHCP Services

Network Address Translation

Running Out of Addresses

Private Addresses

Address Translation

Address Translation Types

Implementing NAT

Port Address Translation

Advantages of Address Translation

Disadvantages of Address Translation

NAT Configuration

PAT Configuration

Address Translation Verification

Exercise 13-3: Configuring NAT Overloading

Address Translation Troubleshooting

Quality of Service

Forwarding Per-Hop Behavior and QoS Terminology

Logging and Syslog

ExamLabs

- Logging Messages
- Logging Severity Levels
- Logging Configuration
- Logging Verification
- Logging CLI Example

Working with NetFlow

- NetFlow Architecture
- NetFlow Configuration
- NetFlow Verification

Chapter Review

Quick Review

- Questions
- Answers

Chapter 14 IPv6

Necessity of IPv6

- Growth Issues
- IPv6 Features

IPv6 Addressing

- IPv6 Address Format
- Calculating Hex Addresses
- Types of IPv6 Addresses

IPv6 Enhancements

- IPv6 Header
- ICMPv6

Address Assignment

- Static Address Assignment
- DHCPv6
- Stateless Autoconfiguration

Routing and IPv6

- Supported Routing Protocols

IPv6 Configuration

- Enabling IPv6 and Assigning Addresses
- IPv6 Static Routing
- RIPng

ExamLabs

OSPFv3

EIGRP for IPv6

Exercise 14-1: Configuring IPv6 Static Routing

Exercise 14-2: Configuring OSPFv3 Routing

Chapter Review

Quick Review

Questions

Answers

Chapter 15 Wireless Networking

Introducing Wireless

Wireless Concepts

Wireless Network Types

Wireless Terminology

Wireless Standards

Channels

Wireless Security Protocols

Cisco Wireless Architectures

Wireless Architectures

Wireless Security Practices

Positioning of WLC

AP Modes

Management Access Connections

Configuring Wireless with a GUI

WLAN Creation

Security Settings

QoS Profiles

Advanced Wireless LAN Settings

Configuring RADIUS/TACACS+

Chapter Review

Quick Review

Questions

Answers

Chapter 16 Security Fundamentals

ExamLabs

Understanding Threats and Attack Types

- Fundamentals of Security

- Vulnerabilities and Exploits

- Common Vulnerabilities

- Malicious Software

- Mitigating Attacks

- Exercise 16-1:** Matching Security Terms

- Attack Types

Authentication and Authorization Concepts

- Authentication

- Authorization

- Accounting

- AAA Services

Password Policy Elements

- Password Complexity

- Password Policy

- Account Lockout Policy

- Account and Password Management

Remote Access and VPNs

- VPN Overview

- Remote Administration Protocols

Implementing a Security Program

- User Awareness

- Employee Training

- Physical Access Control

Chapter Review

Quick Review

- Questions

- Answers

Chapter 17 Implementing Security on Cisco Devices

Configuring Device Passwords

- Enable Password and Secret

- Securing the Console and Auxiliary Port

- Securing VTY Ports

ExamLabs

Exercise 17-1: Configuring Passwords on the Cisco Routers

Configuring Users

Exercise 17-2: Creating Users on Cisco Devices

Encrypting Passwords

Exercise 17-3: Encrypting Passwords on Cisco Devices

Configuring SSH

Exercise 17-4: Enforcing SSH for Remote Administration

Configure Layer 2 Security Features

Disable Unused Ports

Port Security

DHCP Snooping

Dynamic ARP Inspection

Implementing Access Control Lists

ACL Overview

ACL Processing

Creating an ACL

Matching on Addresses: Wildcard Masks

Activating an ACL

Standard Numbered ACLs

Exercise 17-5: Configuring Standard Numbered ACLs

Extended Numbered ACLs

Named ACLs

ACL Remarks

Access List Verification

ACL Changes

Understanding ACL Placement

Standard ACLs

Extended ACLs

Chapter Review

Questions

Answers

ExamLabs

Chapter 18 Automation and Programmability

- Introduction to Automation

 - Traditional vs. Controller-based Networking

 - Benefits of Automation

 - Understanding Planes

- Software-Defined Networking

 - Software-Defined Architectures

 - Separation of Planes

- Campus Device Management vs. Cisco DNA Center

- North-bound and South-bound APIs

- Exchanging Data

 - REST-based APIs

 - Data Formats

 - Configuration Management Technologies

- Chapter Review
