ExamLabs

Microsoft Azure Administrator
Study Guide
Exam AZ-104

Table of Contents

1. Managing Azure AD Objects
- Structure
- Objectives
- Bulk user creation
- User creation
- Group creation
- Group management
- Guest user management
- Self-service password reset
- Azure AD join
- Conclusion
- References

2. Implementing and Managing Hybrid Identities
- Structure
- Objectives
- Azure AD Connect
- Azure AD Connect installation
  - *Pre-requisites*
- Manage Azure AD Connect
- Password writeback
- Enabling the password writeback from the Azure AD
- Enabling password writeback from the portal
- Password sync
- Conclusion
- References

3. Managing Role Assignments Through the RBAC Policy
- Structure
- Objective
- Role-based access control (RBAC)
- RBAC access configuration

Subscription access using the RBAC policy
Resource group access using the RBAC policy
Resource access using the RBAC policy
Custom RBAC role
Creating the custom role
Conclusion
References

4. Managing Azure Subscription and Resource Management
Structure
Objective
Azure subscriptions
Enterprise agreement subscription
Enterprise
Departments
Accounts
Subscriptions
Azure subscriptions support plan
Azure developer support
Professional direct support
Standard support
Azure tenant
Creating a free Azure subscription
Global administrator permission
Resources group
Azure resource group manager
Cost management
Configuration of the budget alerts
Azure subscription policy
Azure policy creation, configuration, and assignment
Azure quota
Resource tag
Usage of the resource tag
Configuration of a resource lock
Resources movement from one resource group to another
Removing a resource group
Creating and configuring the management groups

Conclusion
References

5. Managing and Configuring of Azure Storage Accounts
Structure
Objective
Azure storage account
Azure storage account creation and configuration
Implement Azure storage replication
Generate and manage the shared access signature
Managing the storage account access key
Configure network access to the storage account
Installation and configuration of the storage explorer
Conclusion
References

6. Manage Data in AZURE Storage
Structure
Objectives
Import and export jobs in Azure
Configuring Azure Blob storage
Creating the import and export job in Azure Storage
Azure data box
Configuring Azure AD authentication for a storage account
Copying data using AzCopy
Conclusion
References

7. The Azure File Share
Structure
Objectives
Azure File share
Creating and configuring the Azure File share
Configuration of Azure File sync
Azure File Sync group
Azure File sync troubleshooting
Conclusion

References

8. Creating and Configuring of Azure VMs
- Structure
- Objectives
- Azure virtual machine
- Virtual machine components
- Pre-requisites
- Creating a Windows virtual machine
- Creating Linux VMs
- Azure virtual machine scale set creation
- Configure Azure disk encryption
- Redeploy a VM
- Conclusion
- References

9. Automating Deployment of VMs
- Structure
- Objectives
- Azure ARM template
- Modifying the ARM template
- Template deployments
- Conclusion
- References

10. Creating and Configuring Container
- Structure
- Objective
- Azure Container
- Use of an Azure Container
- Create a container
- Azure Kubernetes
- Create Azure Kubernetes
- Conclusion
- References

11. Creating and Configuring Web Apps

Structure
Objectives
App service
App services plan
Create and configure the app service
Custom domain configuration
App services security
App services backup
Conclusion
References

12. Configuring Virtual Networking and Integrating On-Premises to Azure Network
Structure
Objectives
Azure virtual network
Azure virtual network creation
Azure VNet peering
Virtual network gateway
Site-to-site VPN
Site-to-site VPN connection creation
VNet-to-VNet connectivity creation
ExpressRoute connection
ExpressRoute configuration
Conclusion
References

13. Configuring Load Balancing
Structure
Objectives
Azure DNS
Azure DNS creation
Azure DNS record creation
Azure load balancer
Azure internal load balancer
Front-end IP configuration
Azure backend pool

Health probes
Application gateway
Azure traffic manager
Conclusion
References

14. Securing Access to Virtual Networks
Structure
Objectives
Configuration of private and public IP addresses
Network security group
Network security group association
Route table
Configure and deploy the Azure firewall
Configure and deploy Azure Bastion services
Evaluate effective security rules
Conclusion
References

15. Monitoring and Troubleshooting of Virtual Networking
Structure
Objectives
Network watcher
Network watcher topology
Monitor on-premises connectivity
IP flow verify
Next hop
Network performance monitor
Conclusion
References

16. Analyzing Resource Utilization and Consumption
Structure
Objectives
Azure Monitor
Setup and configuration of Azure alerts
Azure Metrics

Azure Services Health
Diagnostic logs
Enabling the diagnostic settings
Azure Log Analytics
Create the Azure workspace
Utilize log search query functions
Conclusion
References

17. Implementation of Azure Backup and Disaster Recovery
Structure
Objectives
Azure backup
Azure backup vault creation
Azure VMs backup configuration
Azure backup policy
Azure backup report
Azure restoration of VMs
Azure backup operation details
Use soft delete to recover Azure VMs
Site-to-site recovery by using Azure site recovery
Conclusion
References

18. Exam Preparation Guidelines and Assessment Based on Live Questions
Exam preparation guidelines
AZ-104 exam tips
Exam registration
Dummy objective exam questions
Dummy scenario-based exam questions

CHAPTER 1

Managing Azure AD Objects

This book will cover all the AZ-104 exam prospective study material which will help you to clear the exam. We will provide additional information in this chapter which will cover various topics and help you get an understanding of the topics in detail.

These chapters will help you understand the Azure environments easily and help you clear the AZ-104 exam.

Structure

The following topics will be covered in this chapter:

- Bulk user creation
- User creation
- Group creation
- Group management
- Guest user management
- Self-service password reset
- Azure AD Join

Objectives

In this chapter, we will explain the bulk user creation in Azure AD and group creation and management. We will discuss how to provide access to guest users and how to manage guest users. We will cover how the users can reset their passwords using the self-service password and add the devices in Azure AD using the Azure AD join tool.
